

## Vision 2020

Krav til uddannelse/kompetence

Gunnfríður Elín Hreiðarsdóttir  
&  
Magnús B. Jónsson

## Basic questions

- Do we need agriculture as a line of work
- Is agriculture important in our future society
- Do we need to produce our own food

## Do we answer yes or no ?

- Do we accept ...
  - ...increased globalization in food production
  - ...increased stress on the environment

### OR

- Will we choose to set the focus on
  - Environment
  - Nature

## Do we answer yes or no ?

- Different answers between different societies
- We need food and there for we need agriculture
- Food security is a key issue

So perhaps the question is not “do we need agriculture” but how do we want to see it

## Future agriculture ?

What is agriculture ?

- Traditional agriculture
- Expansion to other branches

Uses land as resource

BÆNDASAMTÖK ÍSLANDS

## Wider definition of agriculture

- Perhaps we should also include other resources
  - Water
  - Genetic resources
- We have to have good oversight and be prepared for controlling the use of our resources

BÆNDASAMTÖK ÍSLANDS

## The world needs more food

- Higher food prices
- Is that perhaps good that we don't have extra low prices to compete with???
- Is our production becoming more expensive ???
- We need to be even more competitive than before

BÆNDASAMTÖK ÍSLANDS

## How do we compete

- More specialization
- More technical development

*Consequences are bigger gap between producer and consumer*

- We need also to remember that large scale agriculture is not the only way

BÆNDASAMTÖK ÍSLANDS

## How do we compete

- The consumers are putting more emphasis on
  - Environment
  - Sustainability
- We have to meet the consumers demands and be ready to compete
  - With our production
  - As a line of work

BÆNDASAMTÖK ÍSLANDS

## Future agriculture

- Should be of high standard
- Has to put emphasis on..
  - Efficiency
  - Technology
  - Environment
  - Nature

We have many possibilities and have to be ready to use them

BÆNDASAMTÖK ÍSLANDS

## People in the field of agriculture

- Focus on education
- Solid biological and economical basis
- Understanding the structure and development of the whole society

BÆNDASAMTÖK ÍSLANDS

## Education

- Responsibility
  - Education system
  - Within the agricultural society
- All levels should have good educations
- Demand of basic education ????

BÆNDASAMTÖK ÍSLANDS

## Education

- Specialization within different fields
  - Built on a broad basic knowledge
- Refreshing the knowledge and constantly adding to it
- Flexibility and understanding of different circumstances

BÆNDASAMTÖK ÍSLANDS

## Education

- Combination of practical and theoretical education
- Reduce the distance between different sectors
- To build up a strong chain of professionals in all places

BÆNDASAMTÖK ÍSLANDS

## Agriculture is important for our future

- We have to take initiative in creating our future
- Create a strong network of well educated people
- Strong education is the most important thing

BÆNDASAMTÖK ÍSLANDS
